

## A SPECIAL MESSAGE ABOUT COVID-19

### Esteemed Guests:

Here at Thorp House Inn & Cottages, we have come to regard our guests as friends and family rather than just visitors. The health and safety of all our guests has always been a high priority for The Thorp House Inn. We have long-standing practices in place for cleaning, disinfecting, and food handling. In response to the coronavirus, we are working very hard in making sure everyone here is properly trained and understands the importance of following our added health and safety procedures. These added procedures are based on guidance from local, federal, and worldwide agencies to reduce the risk of spreading all viruses.

- We have increased our cleaning standards in all guestrooms, cottages, common spaces, and employee workspaces, to include disinfecting commonly touched materials in both the common areas and in individual units.
- We continue to use proper disinfectant that is identified to kill coronavirus by the EPA's registered disinfectant list.
- We will follow the social distancing practices and reduce person- to-person contact whenever possible during your stay.

We wish everyone health and safety and look forward to your visit soon!

Stay Safe,

Thorp House Inn Staff
